

WHAT'S NEW IN ARDS

1. A brief history - Arthur S Slutsky
2. What we learned from animal models - John J Marini
3. Should any patient die of ARDS? - Jean-Louis Vincent
4. Are we ready for phenotypes? - Carolyn Calfee
5. Is COVID-19 similar to "usual" ARDS? - Audrey De Jong
6. The role of high flow oxygen and non-invasive ventilation - Karen Burns
7. PO₂ and PCO₂ targets - Rinaldo Bellomo
8. A tidal volume of 6 ml/kg for everybody? - Lise Piquilloud
9. Routine recruitment? - Tommaso Mauri
10. How to optimize PEEP - Carmen Barbas
11. The role of esophageal pressure - Daniel Talmor
12. How technology can assist ventilation - Laurent Brochard
13. How chest ct-scan can orient therapy - Davide Chiumello
14. VILI and p-SILI - Ewan Goligher
15. When and how to use prone positioning - Marco Ranieri
16. When and how to give fluids - Xavier Monnet
17. Transfusion strategies - Nicole Juffermans
18. Hemodynamic monitoring - Antoine Vieillard-Baron
19. When and how to use sedative agents - Gerald Chanques
20. When and how to use myorelaxants - Laurent Papazian
21. When and how to use corticosteroids - Jesus Villar
22. Emerging pharmacological therapies - John G Laffey
23. When and how to use ECMO? - Daniel Brodie
24. Pulmonary infections complicating ARDS - Lila Bouadma
25. How to ventilate those with brain injury - Chiara Robba
26. How to ventilate obese patients - Samir Jaber
27. ARDS in the immunocompromised patient - Virginie Lemiale
28. When and how to wean the ventilator? - Jordi Mancebo
29. Should we routinely use non-invasive ventilation after weaning - Sharon Einav
30. Ongoing and future clinical trials - Niall Ferguson
