

# Pfizer-sponsored symposium at ISICEM 2023

Tuesday 21<sup>st</sup> March 2023 | 12:30–13:30 (CET) | Gold Hall

## From admission to discharge: reflections on early, appropriate treatment of MDR Gram-negative bacterial infections in the ICU

By reflecting on the challenging scenarios that are faced within the ICU and that can influence treatment strategies and outcomes, this meeting aims to:

- Review the patient journey for MDR Gram-negative bacterial infections through practical patient case studies, and explore the critical factors that drive effective treatment decision-making
- Recognise how pivotal clinical studies, real-world evidence, recommendations, and guidelines can be practically applied to support therapeutic selection
- Provide clinical scenarios in which ceftazidime–avibactam could be considered early and appropriately to improve patient outcomes
- Discuss the importance of the multidisciplinary team in ensuring appropriate and optimal decision-making

## Agenda

Chair: Professor Mervyn Singer (UK)

12:30 »

**Welcome and introduction**  
Professor Mervyn Singer

12:35 »

**From admission to discharge: reflections of an ICU specialist**  
Dr Tim Rahmel (Germany)

12:50 »

**From admission to discharge: reflections of an ID specialist**  
Dr Carolina Garcia-Vidal (Spain)

13:05 »

**Panel discussion and Q&A – working closely with the multidisciplinary team to improve patient outcomes**  
All faculty

13:25 »

**Summary and close**  
Professor Mervyn Singer
